

Take the time to read each one before praying it out loud. Absorb the text and let the Holy Spirit guide you as you pray these things over the hospital. Take the time to repeat these prayers, do not rush through them. Allow God to speak to you through his word. There aren't many of them due to the fact that there is already so much to pray for but we did want to make this available to everyone.

Psalms 91

Psalms 23

Jeremiah 17:14

Isaiah 41:1-10

Psalms 27:1

Matthew 11:28-30

Matthew 6:25-34

Do not limit yourself to this list. If there are other passages that come to your heart, pray those too!

## Things to Pray For

### 1. The Staff

- a. There are dedicated workers all over the country working extremely hard during this time. Offer up prayers for them; they need it! pray for safety, strength, and wisdom as they fight off this disease.
- b. The hospital has asked us to pray for these specific areas:
  - The leadership as they make tough decisions and guide the hospital in these tough times
  - Door screeners. They are checking out each person who enters the hospital
  - EMT. They go out in the ambulance to reach those who are in need. They are front line
  - Emergency Department. They are the first ones to see patients and determine the need
  - Critical Care Department. They care caring for the most severe cases in the hospital
  - Nurses and Doctors. They are giving the immediate and continued care.
  - Patient Care Technicians. They give regular care to each patient.
  - Respiratory therapists. They are the ones working directly with respiratory problems.
  - Housekeeping and Dietary workers. They are cleaning up and feeding us all, including patients
  - Security/Hospital police. Keeping us all safe in these times.
  - The disruption in routine/elective medical care

### 2. The Sick/Admitted People

- a. Pray for healing and comfort. There is a lot of fear in all of our lives right now and they are certainly feeling it as well. As Christ followers, we believe that God still heals and performs miracles, so pray for them to happen.
- b. Also, pray for families that are expecting either surgery or families expecting to deliver children during this time. Hospitals are not admitting visitors during this time so many individuals are facing these things without their family with them. Pray for God's hands to rest on them and bring them peace.

### 3. The Families of this Affected

- a. Pray for peace for the families that are effected. They are struggling with the fact that they might not see their loved ones again.

### 4. The Hospital

- a. This is both literal and symbolic. While we are at a physical location, be praying for God to be with those affected around the world. All hospitals around the globe are feeling the effects of this virus so take this time to lift them up as well.

### 5. Scripture

- a. In difficult times, we often have a hard time coming up with words to say. In these moments, we can offer Scripture up as prayer. The Word is filled with the truths of God, and it is perfectly acceptable to offer up these truths. As Christians, we believe that God is still good, that He is still in control, and that he

is working all of these things for our good. Bring your Bibles and offer up these truths.

6. What you feel led to Pray

- a. The Holy Spirit is moving, working, and guiding all of us during this time. Lean in on the prompts you receive. If you feel led to pray for something specific, don't ignore it. God is laying it on your heart for a reason

- 1** 441 Building – MGH Main Hospital
